Feb-2025 - till date

PROJECTS

Todo Web Application:

To-Do List Web Application is a simple, responsive productivity tool built using HTML, CSS, and JavaScript. It allows users to manage their daily tasks efficiently by providing core features such as adding new tasks, marking tasks as complete, and removing tasks.

Technologies used: HTML CSS JavaScript.

(<https://apoorvasai8.github.io/todo-app/>)

Weather Application:

The Weather Web Application is a lightweight and interactive tool that allows users to check the current weather conditions of any city in real-time. Built using HTML, CSS, and JavaScript, the application fetches weather data from the OpenWeatherMap API and displays essential information.

Technologies used: HTML CSS JavaScript.

(<https://apoorvasai8.github.io/weather-app/>)

Food Application:

The food88 application is a dynamic website built on WordPress, designed to showcase food-related content such as recipes, menus, and restaurant listings.

Technologies used: Wordpress
